#### 2. Reason

The Company’s basic policy for profit distribution is to provide stable dividends with a target dividend on equity (DOE) ratio of approximately 2%. Until the restart of the Tomari Nuclear Power Station Unit 3, the Company will aim for a DOE of 2% while making comprehensive judgments with due consideration to the recovery of its financial base.

Regarding the year-end dividend for the fiscal year ended March 31, 2026, the Company had previously planned 15 yen per share. However, based on the above policy, the Company has revised its latest dividend forecast and increased the year-end dividend to 17 yen per share. As a result, including the interim dividend already paid, the annual dividend is expected to be 32 yen per share, with a projected DOE of 1.8%.
